# Our Mission

## Mission

To facilitate connections and intercultural dialogue among Communication scholars throughout the discipline, by encouraging international collaborative research, serving as a source for grants, and serving as a clearinghouse for information.

## Objectives

\*To facilitate international collaborative research examining a wide range of intercultural dialogue contexts, in addition to intercultural communication more generally, and to aid in the dissemination of the results of such research.

\*To help Communication scholars interested in intercultural and international research connect across national boundaries by creating a website to serve as a clearinghouse for both information and funding.

\*To obtain funding and distribute microgrants for intercultural research so Communication scholars can travel in order to develop, or take advantage of existing, international research connections.

# Who we are

The Center for Intercultural Dialogue (CID) is a project of the Council of Communication Associations (CCA). As such, CID broadly represents scholars in the discipline of Communication, but has a specific mandate to directly serve those who are members of any of the 8 member associations of CCA. The goal of the Center is to approach intercultural dialogue at two levels: to encourage research on the topic of intercultural dialogue, but to do so through bringing international scholars interested in the topic together in shared intercultural dialogues about their work.

## CID Staff:
